A JOURNAL IS BORN

The Chinese Medical Journal, Chengtu Edition, Vol. 1, No. 1, has just reached the office of the Current List. It is not printed too well, on the thinnest of papers. Moreover, it seems to have been a year in the mails. Yet this pale blue journal is a symbol of the unbeatable Chinese. The editorial board is made up of men from Cheeloo, National Central and West China Union Universities, and the papers are of considerable scientific interest. Interspersed through the pages devoted to scientific contributions are quotations from Hippocrates, Virchow, Milton, Holmes, Osler, and Archibald Malloch. There are even a few advertisements of concerns in Free China. Much of the expense of the first number has been borne by contributions from professional men in China. The Current List is proud to record the contents of this historic issue. Long live the Chinese and may they soon emerge from the deep shadows of the past five years!

H.W.J.

CURRENT LIST OF MEDICAL LITERATURE is published weekly and lists of RECENT BOOK ACQUISITIONS are issued several times per year as supplements. The subscription price for both is \$5.00 per year in the United States and \$5.50 per year in other countries. The Recent Book Acquisitions may be obtained separately at \$1.00 per year.
